## TERRE ASBL

### 2025 VERIFICATION OF THE SOLID'R LABEL

Forum Ethibel is a Belgian not-for-profit organisation and recognised as an expert in independent control and certification of products that meet societal, ecological and good governance standards. This audit and certification are carried out on behalf of Ressources.

RESSOURCES is the federation of social economy enterprises active in waste reduction through the recovery, reuse and valorisation of resources in a circular economy.

The Solid'R label is an ethical label for companies within the social economy sector active in the recycling, collection and sale of second-hand textiles and goods. The label was created to differentiate from private players in the reuse and recycling market. RESSOURCES launched the Solid'R label for organisations that voluntarily respect certain ethical and solidarity principles and are audited annually. In 2018, Solid'R has been launched on European level to promote these solidarity principles and to apply the social economic criteria. In 2024, Solid'R reviewed their criteria to make them more inclusive for the European context. Find the criteria on the last page of this report.

## CONCLUSION

All requested documents were delivered, and questions were answered in full. Forum Ethibel declares that, for the year 2024, the activities of Terre asbl are partially compliant with SOLID'R Ethical Charter that is based on the European criteria of social economy.

### General remarks:

Activities: Terre asbl is an organisation that focuses on social employment through large scale textile recycling activities. It either sells recycled clothing directly or supplies it to partner organisations. Terre has strategic plans for the next four years containing annual targets in terms of social impact, measured using KPIs. The succession of crises currently affecting the textile recycling sector is simply prompting Terre to try to ensure the continuation of its business and the preservation of its jobs.

Employees: Terre asbl adopts the Terre Group's hiring policy which establishes a transparent salary policy. Similarly, all employees are entitled to 32 hours of training per year in participatory management and, in principle, have access to other more practical training courses geared towards their work. However, very few workers (10%) received any further training of this kind in 2024. This is a point of caution regarding criteria 6 - Democratic control. Terre was unable to communicate its non-discrimination

policy during the verification, which is a point of concern regarding criteria 5 - Voluntary -based and open-based membership.

Governance: Terre asbl complies with the governance principles of the Terre Group. All employees are therefore invited to become members of the Group's General Assembly; they may also attend without being members. Decisions concerning Terre asbl alone are taken at an annual meeting attended by all workers, and workers are regularly informed and consulted on Terre's and the Terre Group's policy at monthly meetings.

## **NOTIFICATION**

### **SOCIETAL VALUE**

The principles and criteria queried and checked during the audit are set out by RESSOURCES. The importance of this audit is to make the public aware of the ethical, social and ecological principles that the organisation in question strives entirely voluntarily.

Based on the audit and the resulting certificate, RESSOURCES determines whether the Solid'R label could be assigned to the concerning organisation (or not).

### **PROCEDURE**

Organisations that want to receive the Solid'R label for the first time are subject to an on-site audit. In the following two years, a remote audit is carried out.

After that, an on-site audit will be organised every three years. For the smallest organisations this is replaced by an online audit. This is important to discuss whether new developments or changes have taken place in terms of vision, strategy or long-term objectives.

By alternating on site audits and remote audits, a balance is respected between maintaining in-depth views about the organisations and pursuing cost-efficiency.
